Technology Partnership Delivers Premier Data Management Services to More Kansas City Businesses

Expansive Comcast Business Ethernet fiber network and state-of-the-art Cavern Technologies data storage facility enhance data integrity, security and stability

KANSAS CITY, Mo. – December 18, 2018 – Comcast Business today announced its agreement with Cavern Technologies, a premier wholesale data center, adding a more competitive data management option to the Kansas City business community. Through this collaboration, Cavern Technologies’ customers will benefit from a reliable, high-speed Ethernet fiber network from Comcast Business to support their data storage and security needs. With this latest network investment, Comcast Business extends its data center footprint to more than 600 locations around the country.

Cavern Technologies is known for its 160,000-square foot, cutting-edge facility and custom data storage solutions for business customers of all sizes and industries. Its underground site sets the data center apart in its ability to protect critical information from the elements and keep assets cool, making it a superior energy- and cost-efficient option for businesses.

“Comcast Business’ commitment to our Kansas City region’s technological infrastructure is a major component in helping us meet our customers’ evolving needs,” said Sean Khurana, Cavern Technologies president and COO. “Our customer base will now have more connectivity options and a robust suite of resources to enhance the reliable data management services they’ve come to know and expect from our facility.”

By building the Comcast Business Ethernet fiber network into the site, hundreds of businesses in the Kansas City market now have the opportunity to collocate their data in an innovative data center and access fast, high-bandwidth connections to their most important assets. The additional connectivity options will not only help bolster the success of current customers in the Kansas City region, but also attract new ones interested in tapping into the modern, trusted network the collaboration has established.

“The exceptional reputation of Cavern Technologies’ services in the Kansas City region is something we are thrilled to be associated with through the addition of our custom-built Ethernet fiber network,” said Kalyn Hove, vice president of business services at Comcast Business. “Helping businesses prosper locally and across the country is our top priority, and we were excited to take on the challenge of developing productive, reliable infrastructure for more customers across one of the most technologically advanced regions in the nation.”

About Cavern Technologies, Inc.

Cavern Technologies, Inc. is a leading provider in the development, leasing and operation of build-to-suit wholesale data centers in the Kansas City region. Located 125-feet underground in a 3-million-square-foot facility, Cavern’s environmentally regulated, secure infrastructure is SSAE 16 SOC 1 Type II and SOC 2 Type II certified. Cavern is designed to meet the specialized power, cooling and security requirements companies need to house IT systems that support their mission-critical business processes. Cavern provides tenants with unique business solutions and a value proposition focused on minimizing the total cost of ownership of data center and colocation infrastructure. <http://www.CavernTechnologies.com>

About Comcast Business
