

Comcast Business E-rate WiFi Services

Demand for high-speed WiFi technology is increasing each year. Our WiFi equipment and services give schools and libraries an easy, reliable way to keep pace without burdening internal IT resources.

Wireless Technology Has Redefined the Learning Environment

Reliable WiFi has become an essential learning tool for K-12 schools. It offers the best way to connect students, teachers, staff and families without the constraints of wired devices. Indeed, most of the devices kids (and many educators) use today – tablets, smartphones and contemporary laptops – have no hard wired network connections.

\$5 billion invested
in new wireless networks
in schools since 2015.

A Flexible Approach to WiFi Services

Comcast Business offers a complete portfolio of WiFi equipment and services so your staff can focus on core educational and operational goals. This includes a fully managed Managed WiFi option with 24/7 customer service support.

We make the process easy by providing a WiFi service that is a turnkey way for you to provide internet access to students, teachers, and staff. From the initial evaluation of your needs, through installation and ongoing maintenance and upgrades, we offer flexible options to meet your budget's needs.

Comcast Business offers:

- Evaluate needs and requirements
- Advanced tools and expertise for solution design
- Install cabling, access points, and core network components
- Integrate into existing systems where necessary
- Provide 24/7 network monitoring and management
- Deploy firmware and other updates as required

If your school or library does not need a fully managed solution, Comcast Business can also provide just the WiFi equipment and related installation and design services.
