

WELCOME TO COMCAST BUSINESS MANAGED VOICE

COMCAST
BUSINESS

Our cordless phone solution, which is wirelessly connected to the network via a base station, has been designed to provide a single telephone number that can be shared across all of your phones with simple simultaneous ring. Although there is no direct dial to a specific phone, each phone can have a separate conversation and concurrent call. The phone below is a Panasonic TPA65. This phone does not require any telephone wiring but does need to be plugged into a power outlet.

Below are display icons and soft keys that will appear on your phone screen. Display icons are indicators for items like signal strength. Soft keys are the three buttons located beneath the phone's display screen that allow you to select options such as phone book.

IMAGE	DESCRIPTION	IMAGE	DESCRIPTION	IMAGE	DESCRIPTION
	Signal Strength		Phonebook		Return to Previous Display
	Signal Out of Range		Ringer Off		Open Phonebook (Press for 2 seconds to unlock)
	Off-Hook Status		Silent Mode		Caller's Phonebook Info.
	Voice Message		Auto Answer		Caller's Info. From Base Unit
	Navigator Key Guidance		Base Station		3-Way Call
	Incoming Call Log		Call Forwarding On		Mute
	Outgoing Call Log		Do Not Disturb On		Answer

Each site must have a Panasonic base station KX-TGP600. This base station connects directly into your router, and transmits a signal to each phone. The base station must be within 100 feet of each phone. Check the signal strength by viewing the display icon.
