

Comcast Business E-rate Managed WiFi

Demand for high-speed WiFi technology in schools is increasing each year. Managed WiFi gives schools an easy, consistent way to keep pace without burdening internal IT resources.

Wireless Technology Has Redefined the Learning Environment

Reliable WiFi has become an essential learning tool for K-12 schools. It offers the best way to connect students, teachers, staff and families without the constraints of wired devices. Indeed, most of the devices kids (and many educators) use today – tablets, smartphones and contemporary laptops – have no physical network connections.

Did You Know?

Some schools are extending their WiFi networks to places like school buses and sports facilities, to give students expanded opportunities to connect and learn.

A Managed Approach to WiFi Services

Comcast Business offers a complete managed service so your staff can focus on core educational and operational goals. Choose Managed WiFi from Comcast Business and get 24/7 customer service support.

We make the process easy by providing a managed WiFi product that is a turnkey way for you to provide internet access to students, teachers, and staff, without the need for a dedicated IT team. From the initial evaluation of your needs, through installation and ongoing maintenance and upgrades, we offer flexible options to meet your budget's needs.

Comcast Business will:

- Evaluate needs and requirements
- Design a solution using advanced hardware and software
- Install wiring, access points, and core network components
- Integrate into existing systems where necessary
- 24/7 network monitoring
- Deploy updates and patches as required

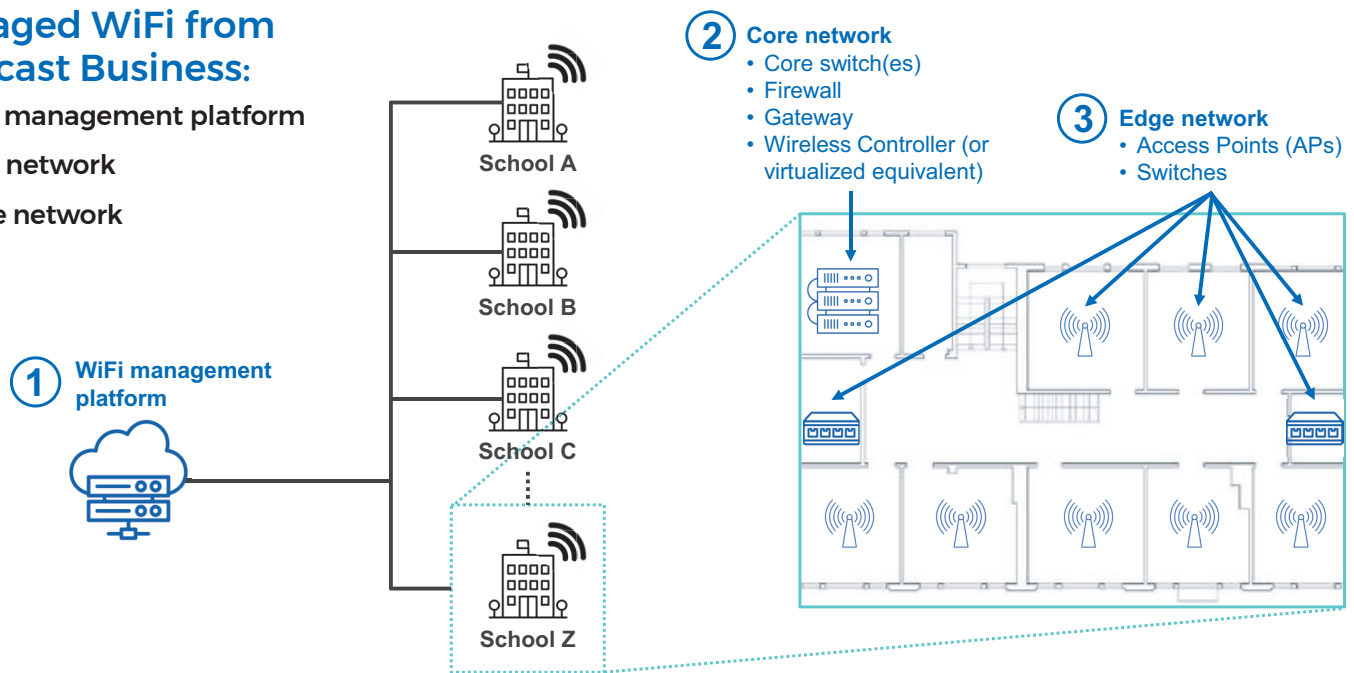

If your school does not need a fully managed solution, Comcast Business offers a la carte equipment procurement, installation, design and turn-up.
